The Introduction of Exotic Dung Beetles to Tasmania

1972 to 2002

This report covers the achievements and experience gained since the first introduction of exotic species of dung beetles into Tasmania in 1972.

Throughout the project practical assistance and funding has been received from the following;

- Entomology Division of the CSIRO,
- Tasmanian Agricultural department (now the Department of Primary Industry, Water and Energy; DPIWE)
- Dairy Research and Development Corporation (DRDC)
- National Landcare Program (NLP)
- Natural Heritage Trust (NHT)

The following people have also assisted with their advice and encouragement;

- Dr George Bornemissza, Hobart
- Dr Tyndale-Biscoe, Braidwood, NSW
- Julian Johnstone, DPIWE, Launceston
- Dr Keith Wardhaugh, CSIRO, Canberra
- Dr Ian Dadour, West Australian Department of Agriculture
- John Feehan, "Soilcam", Hackett, ACT
- John Allen, "AviArk", Baldivis, Western Australia

The final stage of the project (1997 to 2002) was funded by the Natural Heritage Trust and was sponsored initially by the Tullendeena Landcare Group, and subsequently by the North East Coast Landcare Group.
