

# Resourcesmart Snippets Junior Class waste-wise work.

Following on from our video session (in the big class) that highlighted the devastating effects our rubbish can have on marine wildlife, the little class compared packaging and prices of commonly used lunch items.

Mikayla noted, “ We stuck the rubbish on the big piece of paper. We ate all the food.

Tyler said, “The more packaging, the more cost”.

Other comments from the activity ...

Emma – “Buy a large packet and bring enough biscuits for your lunch in a plastic container”.

Brayden and Ivan - “Don’t let it go in the water as the turtles or sharks might eat it and get sick and die”.

Charlie – “Don’t leave rubbish outside”.
